SAINTE FÉLICITÉ'S HISTORY

Rue St Lambert - 1934

Rue St Lambert - 1970

Rue Casablanca - 2017

At the beginning of the last century, the Sisters of Notre Dame de l'Assistance Maternelle established eight maternity beds at 350 Rue de Vaugirard. Over the years, the maternity ward expanded and modernized. In 1990, the Petites Sœurs des Maternités Catholiques took over, and they continue to run the Maternité Sainte Félicité to this day.

The building that welcomes you today opened in 2017 to provide the highest level of comfort and safety for mothers and newborns.

The Maternité Catholique Sainte Félicité is managed as a non-profit organization (Association loi 1901). It is part of the Alliance des Maternités Catholiques, which brings together establishments also run by the Petites Sœurs des Maternités Catholiques.

Three other establishments are part of this federation:

Clinique Saint Vincent de Paul

📍 Bourgoin-Jallieu

Clinique de L'étoile, Maternité Catholique de Provence

📍 Aix en Provence

Centre de Rééducation Fonctionnelle Saint Vincent de Paul

📍 Bourgoin-Jallieu

L'Alliance des Maternités Catholiques, A federation faithful to the history of the Congregation.

To navigate an increasingly complex and demanding ethical, healthcare, and social environment, the Congregation decided in 2005 to unite its establishments under the Alliance des Maternités Catholiques label. This label serves as a way to uphold its core values and promote operational consistency across its establishments.

Our federation is committed to :

- Continuing, in the same spirit, the mission of the Congregation of the Petites Sœurs des Maternités Catholiques.

- Meeting the requirements of medical ethics and human dignity, as well as respecting human life in all its forms.

OPENNESS **WELCOME**
LISTENING **PROFESSIONNALISM**
QUALITY **AVAILABILITY**
ETHICS **COMPETENCE**

Find the charter of l'Alliance des Maternités Catholiques :

PRESENTATION OF THE ESTABLISHMENT

The maternity ward is accredited. We have a neonatal care unit and a high-risk pregnancy monitoring service. Our facilities are equipped to ensure all necessary safety for mothers and babies, as well as a peaceful atmosphere conducive to the birth of a child.

The Maternité Catholique Sainte Félicité is located in a six-story building and is equipped with :

- A state-of-the-art technical platform.

- Two cesarean sections rooms and ten delivery rooms.

- A level 2A neonatal care unit with six mother-child rooms.
- A pregnancy and post-delivery monitoring service for mothers.

The natural birth room.

Do you wish to prepare for the most natural birth possible?

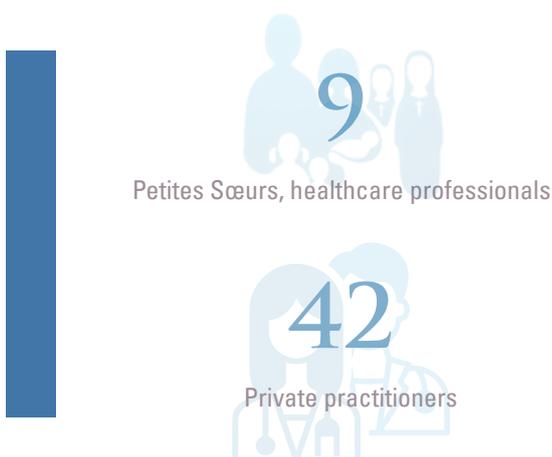

A natural birth room is available to you. It is a true relaxing space, equipped with various features such as a bathtub, a bench, and a sling.

Virtually visit the Maternité Sainte Félicité in 3D :

Here are some key figures of the maternity ward

PRESENTATION OF THE TEAMS

At Maternité Sainte Félicité, 140 staff members work together daily to welcome life and families. Alongside the Petites Sœurs, all healthcare professionals, around fifty doctors and ten private midwives are dedicated to supporting families in welcoming their newborns.

All salaried professionals wear a badge indicating their name and role.

You can also identify the roles of the different people involved in your care and well-being by the color of their uniforms :

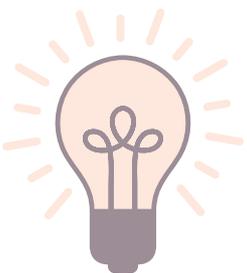

-  **White blouse** : Anesthesiologist-resuscitator, Gynecologist-obstetrician, Pediatrician, Pharmacist, Pharmacy technician.
-  **Blue outfit** : Operating room doctor, Operating room nurse.
-  **Teal outfit** : Birth sector doctor.
-  **Pale pink outfit** : Operating room nursing assistant.
-  **Blue tunic / White pants** : Pediatric nurse, Pediatrician, Health manager.
-  **Burgundy outfit** : Midwife, Midwife manager.
-  **White tunic with blue trim / White pants** : Nursery assistant.
-  **Fuchsia tunic / White pants** : Hospital service employee.
-  **Black polo / Black pants** : Technical services.

Other professionals intervene on a freelance basis, such as :

- Biologists and laboratory nurses
- Radiologists
- Ultrasound technicians
- Physiotherapists
- A midwife osteopath, an osteopath specialized in pregnant and post-delivery women
- A midwife specializing in tobacco cessation
- Midwives specializing in lactation consulting
- Two doctors for consultations on natural fertility restoration
- Two pediatricians for newborn consultations during the first months

If necessary, a list of interpreters is available at the maternity ward reception.

DID YOU KNOW?

The establishment participates in the training of future professionals by welcoming interns from various schools: nursery assistants, nurses, pediatric nurses, and midwives.

PREPARING FOR CHILDBIRTH

Medical monitoring of your pregnancy

In order to give birth at the maternity ward, you will need to have follow-up care with one of the gynecologists-obstetricians practicing at the maternity, as soon as possible and no later than the 6th month.

They primarily hold consultations at their private practice. You can find the list of these doctors on the maternity's website. Prenatal and postnatal consultations are usually conducted at their medical office.

Les consultations pré et post-natales sont effectuées le plus souvent au cabinet médical.

An obstetric on-call service is available on-site 24/7.

List of Doctors

Various biological and medical imaging exams are performed during pregnancy. Several are essential, and some are mandatory. Your doctor will prescribe them and explain their purpose. Be sure to bring them to each consultation.

You can have your ultrasounds for all three trimesters at the maternity ward, as a team of gynecologist ultrasound specialists is available at Sainte Félicité.

A team of anesthesiologists-resuscitators ensures continuous availability for regional anesthesia and any procedure within their specialty.

An anesthesia consultation is mandatory with one of the anesthesiologists-resuscitators practicing at the maternity from the 8th month of pregnancy.

Appointment scheduling

Presentation of the maternity ward

To help you experience a peaceful stay at the maternity ward, the Petites Sœurs offer an online presentation evening. The functioning of the maternity ward and its various services will be presented. Dads are strongly encouraged to participate.

Dates & Registration

Preparation for childbirth and parenthood

The team of private midwives at the maternity supports patients throughout their pregnancy. The first meeting takes place from the 4th month during the Early Prenatal Interview, a time for listening and providing information.

Birth preparation sessions are also offered to help you approach the arrival of your child as calmly as possible: physical preparation, relaxation exercises, breathing, and pushing techniques are among the practices included in these sessions.

The newborn's feeding, rhythm, and needs are also covered to help you support your baby.

If you have a birth plan, share it with your referring gynecologist-obstetrician or midwife during your Early Prenatal Interview so that it can be validated before the day of delivery.

Do you wish for a physiological birth? A natural birth room will be made available to you if this plan has been validated by the entire medical team and depending on its availability at the time.

More Information

39 weeks of amenorrhea consultation

This consultation must be prescribed by your gynecologist-obstetrician. It will allow for the opening of your file within the maternity ward. During this appointment, a medical check-up of your health and your baby's health will be performed.

You can schedule an appointment with the midwives working with the maternity directly on the Maternité Sainte Félicité website.

THE ADVANTAGES OF SAINTE FÉLICITÉ

To support parents during this new stage of their life, we are committed to providing personalized assistance throughout pregnancy and in the early months with your baby. We offer workshops and consultations to answer all your questions.

The workshops

Baby care workshop

Babywearing workshop

Spiritual preparation for birth

Support for couples who have experienced a natural miscarriage

Support group for sharing experiences of difficult childbirth

A concern? Specific support.

Information and registration.

The majority of the discussion groups and workshops are free of charge. You can support us by making a donation through our endowment fund.

I MAKE A
DONNATION

Complementary care

Tobacco cessation consultation

Lactation consultation

Perinatal hypnosis

Perinatal hypnosis

Pediatric consultation

Osteopathy

Acupuncture

Information and registration.

Psychologists are available at the maternity ward for individual consultations if you wish. You can meet with them before the birth, during your stay, and once you're back home.

If you would like general information on natural birth regulation and self-observation methods, please speak with the Petite Sœur in your department.

THE STAY

The Arrival

Upon your arrival, please go to the reception, where your administrative information will be taken before you are directed to the birth sector, where you will be welcomed by a midwife.

Based on your examination, the midwife will contact your referring gynecologist-obstetrician. If everything is in order, you will be directed to the delivery room. If the father is unable to be present, someone of your choice can stay with you in the delivery room.

For your admission, please bring the following:

Medical documents

- Blood group results (with 2 determinations)
- Test results
- Ultrasound results

Administrative documents

- Identity document and a copy
- Family record book or anticipatory recognition
- Updated Vital Card and 100% maternity certificate
- Vital Card certificate of spouse › Identity card

If you have a personalized birth plan approved by your referring obstetrician or midwife, don't forget to bring it.

The layette

We ask that you bring your personal items (towels, gloves, soap, toothbrush, toothpaste etc.).

Complete list available for download.

Television

All rooms are equipped with a television. You can access various programs and explore our internal channel.

- On "loop": names of babies present in the maternity ward, updates, and information about life in the facility...
- Broadcast of various videos regarding your baby and your return home.

WiFi is free !

Meals

Meals are served in your room at the following times:

- Breakfast around 7:30 AM
- Lunch starting at 12:30 PM
- A snack is offered around 3:30 PM
- Dinner around 7:00 PM.

You have a hospitality card that allows you to choose your meals with the staff on your floor.

Please be sure to mention any specific dietary requirements. For any accompanying persons, you have the option to order a meal. Meal orders for accompanying persons should be placed in advance at the maternity reception.

Lounge

The Sainte Colette lounge on the 2nd floor and the Sainte Geneviève lounge on the 3rd floor offer you the opportunity to welcome and spend time with your parents outside your room.

Worship

The chapel is open all day from 6 a.m. to 9 p.m. You can take part in the Eucharist, as well as the Lauds and Vespers services with the community of the Little Sisters. These services are also available on our internal channel.

Find the service times here :

The Sainte Félicité Catholic Maternity Hospital welcomes and respects everyone's religious beliefs. You can also request a moment of prayer to give thanks for the birth of your baby and their arrival in your family.

If you wish, you can call upon the minister of worship of your choice.

Rules for Respecting Community Life

The phone

- The use of mobile phones must be limited and always set to silent mode.

Sécurité

- Smoking is strictly prohibited within the establishment (including electronic cigarettes). The maternity ward is equipped with detectors that immediately locate any smoke emission or fire outbreak to prevent its spread.
- In case of an alarm signal, stay calm, remain in your room with the door closed, and wait for instructions from the staff.
- Please do not plug in any electrical devices from outside in the rooms.
- We also ask you not to place anything on the windowsill.

Money and Valuables

- Avoid bringing any valuables. Upon your arrival in the birth sector, you will have access to a secure locker.
- Each room is equipped with a small safe with a code. It is strongly recommended to store all your valuables there, even for a short absence.

The maternity ward management cannot be held responsible for valuables and money that may be stolen from the rooms.

Visits

Visits are allowed for the newborn's siblings and grandparents every day

**From 3:00 PM
to 6:00 PM**

To respect the newborn's and mother's rest and recovery, we recommend short visits, limited to three people.

Respecting the visiting hours allows the medical and nursing staff to provide care under optimal conditions.

Please avoid lingering in the hallways for an extended period.

To protect your baby from infection risks: Visits from sick individuals (flu, cold) are not allowed, even with a mask.

Newborn siblings are welcome as long as they are not sick. However, they must respect the necessary calm for mothers and hospital staff.

Please respect and ensure compliance with the silence guidelines, which are essential for the rest of patients and newborns.

Only one accompanying person is allowed in the delivery room.

Parents going down to the ground floor with their baby must keep the baby in the bassinet and take the elevator. For safety reasons, outings with the baby outside are not permitted, even in good weather.

The inner courtyard is not a play area. Please respect the silence for patients and newborns whose rooms overlook this space.

For the safety of patients and the responsibility of the establishment, we ask mothers not to leave the premises (beyond the Casablanca and Duranton street gates).

To prevent the risk of nosocomial infections (infections contracted during hospitalization), simple hygiene measures must be followed:

- Disinfect hands with hand sanitizer.
- Avoid access to individuals or children showing signs of illness or infection.
- Do not sit or lie on the hospitalized patient's bed.
- Keep visits short.
- Maintain cleanliness in the room and surrounding areas.
- Limit children's visits.
- Do not use the room's bathroom, which is exclusively for the hospitalized patient. Restrooms are available for the father.
- Potted plants and cut flowers are not allowed in the rooms.

A proper dress code must be observed by patients and accompanying persons at all times, including in the room provided during your stay. This is a sign of respect for the healthcare staff.

Alcoholic beverages are prohibited.

All areas are non-smoking (Decree of November 15, 2006). Violations may result in fines. The provision of an accompanying bed for the night is subject to specific regulations.

Movements after 10:00 PM should be kept to a minimum out of respect for the night staff.

And the father ?

Childbirth is a medical procedure, but it is primarily a family event. The father has an important place. The period of observation after birth becomes a time of intimacy for the three of them.

That's why we offer, at no extra charge, the possibility for the father to stay one or more nights with the mother and baby. Each night includes breakfast served directly in the room (which must also be reserved through the reception service), as well as a "father's kit" for the entire stay, which contains a fitted sheet, flat sheet, pillowcase, and a toiletry kit with essential items.

Consult the father's charter:

THE ADMINISTRATIVE FORMALITIES

The birth declaration

Day of delivery	Last deadline
Monday	Next monday
Tuesday	Monday
Wednesday	Monday
Thursday	Tuesday
Friday	Wednesday
Saturday	Thursday
Sunday	Friday

It must be done within five days following the birth, by the father or a family member. This birth declaration is made at the:

Town Hall of the 15th arrondissement
31 rue Péclet

It is necessary to collect the required documents at the maternity reception.

Please do not lose them, as we will not be able to issue a new original.

For more information, you can contact:

The Civil Registry of the Town Hall of the 15th arrondissement.

+33 (0) 01 55 76 75 71

If you wish to give your child both of your last names, you must include the "Joint Declaration of Name Choice" with these documents, which can be downloaded below:
or from www.service-public.fr

At the time of your discharge

The date of your discharge is set in agreement with your obstetrician and the pediatrician.

You are asked to: vacate your room by 10:00 AM at the latest.

Before leaving the facility, you must report to the administrative office starting at 9:00 AM (located on the ground floor of the maternity ward) in order to:

- make the necessary payments:

- ➔ For the maternity, payment can be made by check, credit card, or cash (up to a limit of €1,000).
- ➔ For each practitioner, payment can be made by check or cash.

- to receive the administrative documents related to your hospitalization.

Hospital stay fees.

The fees related to your stay in the maternity ward can be downloaded below:

OUR COMMITMENTS

Available on our website :

The prevention of healthcare-associated infections

The Maternité Sainte Félicité has a committee for the prevention of nosocomial infections (CLIN), responsible for the prevention, monitoring, and reporting of healthcare-associated infections (HAIs), in order to improve the quality and safety of care. The CLIN continuously monitors:

- The incidence of surgical site infections,
- The incidence of bacteremias,
- The consumption of hydroalcoholic solutions,
- The incidence of multidrug-resistant bacteria,
- The results of environmental controls,
- The consumption of antibiotics.

An Operational Hygiene Team (EOH), composed of nurses, midwives, and a hygiene pharmacist, prepares the action plan for the CLIN, implements it, and ensures the application of recommended hygiene practices in the hospital setting. In the case of a scheduled intervention, precautions are also required from you. These measures are designed to protect you from infection.

For preoperative showering and shampooing, which should be done the evening before and the morning of the procedure, mild soap is recommended. To reduce the risk of surgical site infection (SSI), it is advised not to shave the area. However, if shaving is necessary, it is recommended to opt for trimming or chemical hair removal.

Instructions for the preoperative shower :

Hand hygiene

Hand sanitizer dispensers are available in each room for you and your visitors.

Toiletry kit

We ask that you bring your personal belongings (towels, gloves, soap, toothbrush, toothpaste, etc.).

Please remove all jewelry, piercings, makeup, nail polish on both hands and feet, and false nails before hospitalization.

Medication management

In preparation for your hospitalization, regardless of the nature of your stay, you will meet with an anesthetist. During this consultation, you will need to:

- **Inform them of any ongoing treatments,**
- **Specify any allergies,**
- **Bring the corresponding prescription.**

Upon your arrival

You are invited to give your personal medication and prescription to the nurse or midwife who welcomes you. They, under the supervision of the doctor, will manage your treatment during your entire hospitalization. Your medication may be modified:

- There may be changes in the name, color, or shape of your usual medications (use of generics),
- Some medications must be stopped in case of surgery or anesthesia,
- Some medications may have iatrogenic effects (harmful interactions with others).

During your stay

We ensure the comprehensive management of your treatment. **Do not take any other medications in addition to the treatment given by the staff.** The healthcare professionals will inform you about the prescribed treatment: medications, their purpose, treatment duration, and times for administration. We ask that you follow these instructions. Report any issues related to medication use: side effects (sweating, nausea, headaches, etc.), difficulties swallowing pills.

Upon your discharge

You will leave with a prescription. Your primary care doctor will be notified by a discharge letter sent by the doctor who cared for you. Your personal medication and prescription will be returned to you.

Pain management

At the Maternité Sainte Félicité, professionals coordinate actions related to pain management through the Pain Management Committee (CLUD).

It is chaired by an anesthesiologist-resuscitator and develops an annual program focused on four key areas:

1. Defining the pain management policy
2. Implementing pain management measures
3. Implementing information and training actions
4. Evaluating practices related to pain management

These efforts ensure that effective strategies are in place to address and alleviate pain for patients during their stay.

You are worried about pain... Our teams are committed to anticipating, preventing, and relieving your pain. Be an active participant in your care: everyone reacts differently to pain, and it is possible to measure its intensity. To help us better adjust your treatment, we will ask you to assess your pain using a validated pain scale.

User Committee

- **What is the role of the User Committee**

The User Committee (CDU) ensures that the rights of patients are respected and helps facilitate their actions in case of disputes related to the hospital's reception policies and patient care.

The committee informs patients about the available channels for appeal and conciliation. It is also responsible for making recommendations to the management to improve the welcome and care provided to patients and their families.

- **When and how to contact the User Committee ?**

Before contacting the committee, the patient or a family member can first address their concerns verbally to the head of the service where the patient is hospitalized. If this is not possible or if the explanations do not satisfy the patient, they have the option to:

- Either have their complaint or grievance recorded in writing for transmission to the legal representative of the establishment. In this case, a copy of the document must be provided to the patient without delay.
- Or directly send a written complaint or grievance to the director.

The representatives of the users can be reached by email at:
representants.usagers@sainte-felicite.fr

- **How is the request handled?**

Complaints and grievances are addressed to the director, who can:

- Either respond promptly, informing the complainant of the option to contact a mediator and be accompanied by a user representative.
- Or inform the individual that the matter has been referred for further action.

To find the composition :

Access to Health Information

The clinic places great importance on protecting patients' privacy and personal data. It is responsible for processing their personal information.

The facility uses various software systems for administrative management and patient medical records. Access to and processing of patients' personal data are carried out by authorized personnel. Each user only has access to the personal data necessary for their tasks or role. All staff members are bound by professional secrecy and a duty of confidentiality.

Patients' personal data include the following:

- **Identification data**
- **Administrative data**
- **Medical, paramedical, and social data**
- **Other necessary data or those required by law**

These data are stored in compliance with regulations, with a general retention period of 20 years from the date of your last visit (*in accordance with Article R 1112-7 of the French Public Health Code*). They are collected directly from you during your care process.

The purpose of processing patients' personal data includes:

- Administrative management and communication with patients
- Mandatory national assessments conducted by the Ministry of Health
- Medical, paramedical, and social care
- Ensuring patient safety (identity verification and vigilance)

Some of these purposes are strictly regulated and require the patient's consent or that of their legal representative. The digital data collected is stored either internally on the facility's servers or externally by a certified health data host, in compliance with regulatory provisions (Articles R 1112-1 to R 1112-9 of the French Public Health Code) regarding the storage of personal health data by a public or private healthcare facility. Paper records are stored either internally or with an approved external service provider.

Certain personal data may be transmitted as part of a legally regulated transfer or with the patient's consent to:

- Health insurance organizations (including complementary insurance providers)
- Attending physicians
- The facility's insurance provider in case of a dispute
- Patients and/or their legal heirs, in accordance with the applicable provisions of the Public Health Code
- Other recipients, as part of a transfer requested by and/or with the patient's consent
- Public authorities

The protection and security of these data are ensured by strict technical and organizational procedures under the legal responsibility of the Director of the facility. You have the right to access the information concerning you (Article L 1111-7 of the French Public Health Code), in order to verify its accuracy and, if necessary, to correct, complete, update, object to its use for legitimate reasons, and request the deletion of these data.

You can exercise this right, regulated by law, by contacting the physician overseeing your care or the facility's management (direction@sainte-felicite.fr). For any questions regarding data protection or difficulties in exercising your rights, you can, in accordance with the provisions of the Data Protection Act and the General Data Protection Regulation (GDPR), contact the Data Protection Officer (DPO):

- dpo@sainte-felicite.fr
- Madame la Déléguée à la Protection des Données (DPO)
- Maternité Sainte Félicité, 7 Rue de Casablanca, 75015 PARIS

Request for Access to Your Health Information

In accordance with Article L1111-7 of the French Public Health Code, you can request access to your health information and obtain a copy of it. To consult this data during your stay, simply make the request to the physician overseeing your care in the facility.

To obtain a copy of this data after your stay, the request should be made to the Director of the facility.

The legal deadline for sending the documents is 8 days from the confirmation of the request if your hospitalization occurred within the last 5 years, and 2 months for hospitalizations that occurred more than 5 years ago.

For data related to consultations with a physician and surgical reports, or pathology reports, the request should be made to the physician consulted or their secretary.

[Download the form here.](#)

Quality

Satisfaction Survey ★★★★★

Concerned with improving our services and the quality of your medical and care management, we will provide you with a feedback questionnaire at the end of your stay. Your opinion is valuable to us, so please take a moment to complete the questionnaire and drop it in the mailboxes available on all floors and near the discharge office.

You can also share your feedback on...

Google

Additionally, the facility participates in the national patient satisfaction survey conducted by the Ministry (e-satis).

After your discharge, you will receive an email (if you provided your email address during registration and/or at the admissions/discharge office) with a link to the online questionnaire. The email address you provided will not be used for commercial purposes, but only for participation in the national survey and, if necessary, to send you information from the clinic.

Certification

You can consult the certification reports and the results of the national indicators on the quality and safety of care at the Maternity on the HAS website or by scanning the QR code:

Mon espace santé and the Shared Medical Record

Mon espace santé is a public digital service designed to manage your health data. It allows you to store your medical information and share it with the healthcare professionals who are treating you and whom you have authorized.

In it, you will find, among other things:

- The contents of your shared medical record (DMP)
- A secure messaging system to communicate confidentially with healthcare professionals. As a reminder, you should not exchange health data with professionals via unsecured messaging.

Who can access my Health Space?

You can set the rules for confidentiality and access to your health information. You can:

- Block access to certain healthcare professionals
- Hide documents of your choice (making them invisible to professionals who consult your health documents via the DMP).

Upon your discharge, the maternity unit will update your DMP with the following documents (*unless you notify your refusal during registration): discharge letter provided on the day of discharge, operative or birth report, and a discharge prescription if needed. These documents will also be provided to you in paper form, along with discharge advice, instructions for detecting potential complications, and the contact number in case of need. If you provided your family doctor's contact details at registration, they will also receive these documents.

Note: The health space is for patients who are affiliated with social security.

Website : <https://www.monespacesante.fr/>

Identity Vigilance

At Sainte Félicité Maternity, your data is secured at every stage of your care.

During your registration, you will be asked to provide **proof of identity** in order to create or update your file. The **identification bracelet** is a safety tool for your care. Throughout your hospitalization, and especially during procedures and examinations, all professionals will ask you to confirm your identity. Please join us in being active participants in your identification!

During your consultations, your identity will also be verified. Please make sure to bring a valid **identification document** (ID card, passport, permanent residence permit) as well as documents proving your social security coverage.

Did you know ?

Since January 1, 2021, healthcare facilities have been using the "National Health Identifier" (INS) to assign a unique and permanent identity to users.

Indeed, proper patient identification is the first step in a process that continues throughout their care by various healthcare professionals.

It contributes to the quality of care and patient safety. It provides patients with a unique and permanent identity, facilitating the exchange and sharing of health data among all actors involved in the patient's healthcare and medico-social follow-up, as well as in the shared medical record (DMP). The National Health Identifier has several objectives: This identification is carried out in accordance with the information provided on a valid identification document (French or foreign national identity card, passport, permanent residence permit). **Be sure to bring one of these identification documents to complete the administrative procedures.**

Advance directives

(Cf. article L.1111-11 of the Public Health Code.)

Any adult may, if they wish, write advance directives for the situation where, at the end of life, they are unable to express their will. These directives outline their wishes regarding the conditions for limiting or stopping treatment.

They will be reviewed before making a medical decision, and their content takes precedence over any non-medical advice. They can be canceled or modified at any time. If you want your directives to be taken into account, please bring the information sheet provided during registration, completed and signed.

THE ENDOWMENT FUND

Since over 100 years, Maternité Sainte Félicité has been welcoming and supporting families with care and expertise. Today, to further our mission, we are creating a foundation fund that will allow us to **develop support projects for parents, improve the welcome for families, and strengthen our teams.**

Our main objectives:

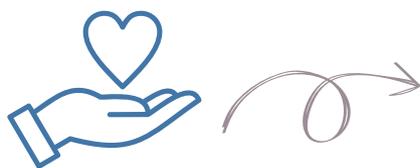

- 1 **Supporting young parents from birth**
- 2 **Improving infrastructure to welcome families**
- 3 **Strengthening and training our teams for quality service**

Your support can make a difference! !

Together, we can continue to ring the bell of the maternity ward to celebrate every new life.
